

Key Function

ON/OFF

On/off is used to temporarily turn the power on or off.
Press it once, the timer has no output, press it again to restore the output.
Note: This key is only used for power on or off, does not control the timing time, the timing time is controlled by the timing function key.

Dimming

Use this button to dim the light, the brightness range is 0-100%, each press changes the output by 10%.

Timing

Timing button is used to control timing and cycle operation.
Press once: The red indicator light turns on. The timer is set to activate for 6 hours and deactivate for 18 hours.
Press 2nd: The green indicator light turns on. The timer is set to activate for 8 hours and deactivate for 16 hours.
Press 3rd: The blue indicator light turns on. The timer is set to activate for 10 hours and deactivate for 14 hours.
Press 4th: All indicator lights turn off, and the timer is permanently deactivated.

Indicator light

Red indicator 6H: the product works ON 6H, OFF 18H
Green indicator 8H: the product works ON 8H, OFF 16H
Blue indicator 10H: the product works ON 10H, OFF 14H

HOW TO USE IT

To get started, follow the steps below.

- 1 Install the light to your aquarium and make sure the screws are tightened.
- 2 Connect the power adapter to the lamp, make sure it is correct \ and turn on the power.
- 3 Press the power button to turn your light on or off.
- 4 Adjust the brightness of the lamp through the dimming button, each press changes the output by 10%.
- 5 If desired, set the timer to 6, 8, or 10 hours by pressing the clock icon, 1, 2, or 3 times. Make sure you set this at your desired on time. The light will auto matically run for the prescribed time each day. For example, if you set your light to 6 hours at 9:00 AM, it will shut off at 3:00 PM, then turn back on at 9:00 AM the next day.
